BIBLIOGRAPHY ON
COCCIDIOIDOMYCOSIS

	<u>Page</u>
Introduction.....	2
I. General.....	4
II. Diagnosis, Detection and Identification.....	12
III. Clinical Picture.....	14
IV. Culture Media.....	20
V. Morphology, Metabolism, and Nutrition.....	22
VI. Human Pathology.....	23
VII. Viability.....	28
VIII. Serology and Antigenic Structures.....	28
IX. Virulence.....	32
X. Effect of Physical Agents.....	32
XI. Effect of Chemical Agents.....	34
XII. Immunology and Prophylaxes Vaccines.....	37
XIII. Chemotherapy.....	38
XIV. Other Therapy.....	39
XV. Animal Sources and Animal Pathogenicity.....	40
XVI. Animal Pathology.....	44
XVII. Methods.....	45
XVIII. Staining.....	46
XIX. Tissue Culture.....	46
XX. Epidemiology	
General Epidemiology.....	48
Laboratory Infections.....	50
Epidemic Countries.....	51
Author Index.....	59

References marked with an asterisk (*) are those which are available for loan in the Fort Detrick Technical Library. This bibliography is being kept up-to-date by a file of current references which is available in the Library.

The 1952 bibliography on coccidioidomycosis was revised. This 2nd edition with additional references covers the literature to date. Sources of references were: Biological Abstracts, Current List of Medical Literature, Index-Catalogue of the Surgeon General's Library, Quarterly Cumulative Index Medicus, and bibliographies of many of the papers.

No attempt has been made to include all case histories or clinical aspects, but it is hoped that no serious omissions have occurred.
